

## Concrete EPD Support Program

CCA is delighted to offer an efficient new service to support companies prepare Environmental Product Declarations (EPDs) for premixed concrete products.

### BACKGROUND:

There is a growing need for independently verified EPDs, however the preparation of these can be expensive and resource intensive.

### CCA SUPPORT:

CCA has developed a program to assist our industry produce & publish their own product specific EPDs by providing “background” and “self-declaration” reports ready for third party verification.

### THE PROGRAM:

CCA will guide companies through a step-by-step process:

**STEP ONE:** CCA will provide companies with a Data Survey to be used to confidentially collect information on raw materials and manufacturing processes.

**STEP TWO:** CCA staff will undertake a Life Cycle Impact Analysis.

**STEP THREE:** CCA will provide a “background report” for each product reviewed.

**STEP FOUR:** CCA can connect Members with suitably qualified verifiers to undertake the third-party verification and EPD publication step.

### VALUE:

- **EPDs are Preferred by Green Star and ISC Rating systems:** Both highly sought after by project proponents.
- **Australian sourced & Factual**
- **Certified Tool:** CCA will be using the GCCA EPD Tool, which ensures consistency across the industry and reduces costs of EPD verification by as much as 50%.

The verified LCA model and project database ensures that the generated pre-verified EPDs are robust for product comparison and development.

### COST:

CCA is offering this service at a nominal cost to support concrete manufacturers wishing to develop EPD's.

Precise costings will be available on request, considering the application specifics and desired outcomes.

### Expressions of Interest:

Expressions of Interest to participate can be made by filling in the enquiry form. CCA will review your requirements in detail and advise the next steps.
